

Del-Ron®

GTR Special

A real fully synthetic transmission oil, developed especially to be used in **dual-wet clutch (DCT-DSG)** transmissions.

High viscosity index, very good lubrication at extremely high operating temperatures and low temperatures.

Excellent stability, even under stress and long service life.

Very wide operational temperature range, multigrade properties.

Cleanliness, by its synthetic nature the oil resists formation of varnish and therefore keeps valves and such operating correctly.

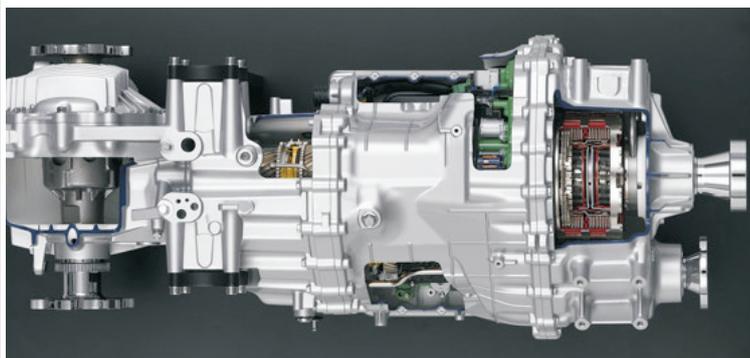

With the good properties and additives the oil helps to reduce wear and increases the life of the components.

Attention! Do not use this oil at axles or differentials.

Manual transmission rating: API GL-4

Real life experiences:

In many cases the transmission runs cooler using Del-Ron oil. We have seen a lot less wearing out using the Del-Ron oils compared to other brands.

Do not mix with other oils or additives !

Values may vary/change, Please note that these properties do not constitute a specification and are not an warranty or guarantee of any properties.
